DETAILED ACTION

Response to Amendment

The Amendment, filed on June 30, 2005, has been entered and acknowledged by the Examiner.

Cancellation of claims 2-7 and 13-46 has been entered.

Claims 1, 8-12 and 47-52 are pending in the instant application.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specifications,

At page 1, the sentence that was inserted on a separate line before BACKGROUND OF INVENTION, by the Preliminary Amendment filed on September 10, 2003, has been amended as follows:

--This application is a continuation of Application No. 09/572,079, filed May 17, 2000, now U.S. Patent No. 6,716,077, issued April 6, 2004, the subject matter of which is incorporated by reference herein.--

Allowable Subject Matter

Claims 1, 8-12 and 47-52 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of depositing a precursor in the openings of the photoresist to form at least one layer of fixed geometry wherein the depositing step is performed using chemical vapor deposition and wherein a gas phase reaction during the chemical vapor deposition results in a product that condenses to form the precursor in a substantially liquid form on walls of the openings.

Regarding claims 8-12, claims 8-12 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 47, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 47, and specifically comprising the limitation of depositing a sol-gel precursor on a top surface of the substrate to form at least one layer of fixed geometry, wherein the depositing step is performed using chemical vapor deposition, and wherein a gas phase reaction during the chemical vapor deposition results in a product that condenses to form the precursor in a substantially liquid form on walls of the openings.

Regarding claims 48-52, claims 48-52 are allowable for the reasons given in claim 47 because of their dependency status from claim 47.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
